

ROUTESMART COMMERCIAL FRONT-LOAD ROUTING

Solve workload balancing challenges across your fleet

Our industry-proven solution includes innovative tools designed for your multi-frequency commercial service route planning.

Optimize your multi-day routing to improve:

TOTAL ROUTE TIME

TRAVEL DISTANCE

SERVICE PATTERNS

SAFETY COMPLIANCE

WORKLOAD BALANCING

ENHANCE OPERATIONS

Our solution's intuitive map display, including container and service frequency pattern symbology, allows you to visualize service patterns and easily edit service days for your highly valued commercial accounts.

With both automated and manual day change capabilities, you can model, store and compare deployment scenarios to find the best solutions for your needs. View reports and graphs developed to analyze your changes and balance (Figure 1).

After choosing your solutions, seamlessly integrate into RouteSmart Navigator, our in-vehicle voice and visual navigation device powerful enough for full high-density routing solutions.

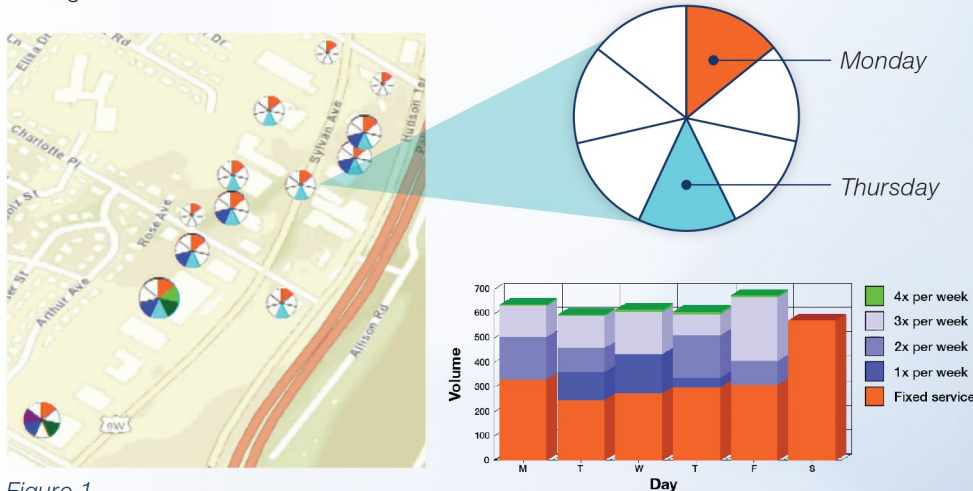

Figure 1

FUNCTIONAL CAPABILITIES

- Distribute lifts, weight, volume and time across fleets to create balanced and geographically compact truck territories
- Shift the day pattern of a given customer to improve workload balance across a weekly cycle
- Preserve preferred service patterns or change current patterns to more favorable ones
- Avoid day changes for specified customers with contractual day agreements
- Maintain established pickup frequencies for customers receiving service multiple times per week
