KEY IMPACT AREAS

REDUCE COSTS

Cut travel time and distance from every route, every day to **unlock major cost savings** and gain a competitive edge.

CUT PLANNING TIME

Get drivers on the road up to **30 minutes faster**. Provide your team with reliable, accurate delivery sequences aligned with the way drivers work.

MAKE DELIVERIES ON TIME

Clients have boosted on-time deliveries **by 33%**. Balanced routes improve driver productivity and help ensure packages arrive when promised.

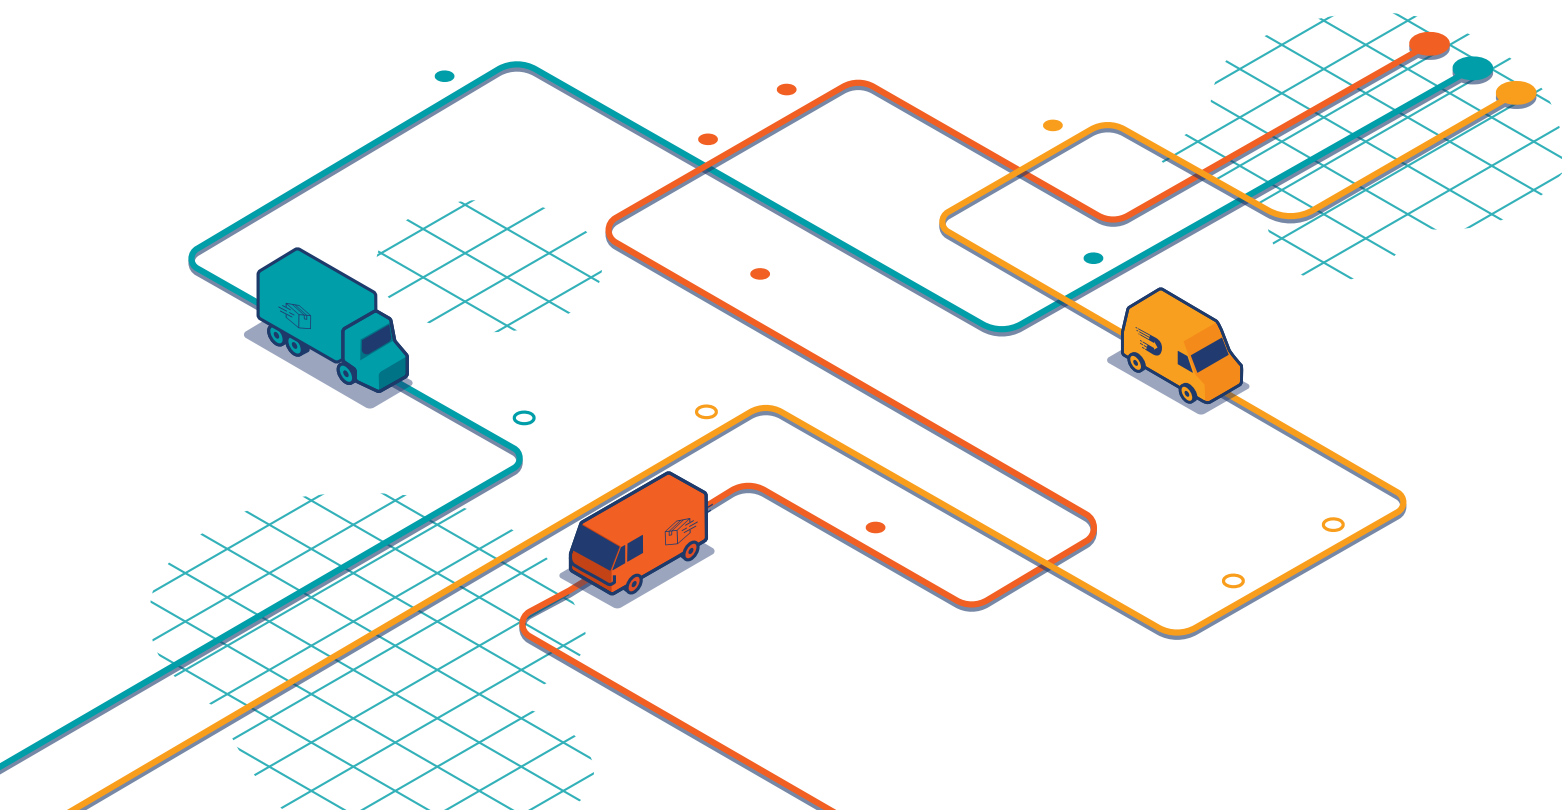

SIMPLIFY INTEGRATION & DEPLOYMENT

Seamlessly integrate our API with your existing warehousing, sorting and telematics systems to **make an immediate impact**.

IMPROVE WORKFLOW

Create logical neighborhood sequences that **simplify loading and retrieving** of packages.

ADVANCED ROUTE PLANNING SOLUTIONS

We deliver leading-edge route optimization solutions, built on advanced operations research and decades of proven industry expertise.

DAILY ROUTE PLANNING & MANAGEMENT

RouteSmart Optimize streamlines daily delivery operations with fast, flexible route planning designed for changing workloads. Easily balance route territories, sequence stops and manage daily operations through an intuitive web-based interface. With seamless API integration into existing systems, RouteSmart Optimize helps dispatchers adapt quickly and keep drivers moving efficiently every day.

SCALABLE WEB SERVICES TO PLAN AND OPTIMIZE YOUR OPERATIONS

RouteSmart Engine provides powerful web service and enterprise solutions that transform route planning. By generating geographically compact and balanced workloads faster and more accurately, RouteSmart Engine outpaces other systems that deliver only inefficiency.

DETAILED PLANNING & ANALYSIS

Support GIS-based analysis of route operations by leveraging the world's leading desktop GIS system from Esri, powered by RouteSmart business intelligence. RouteSmart Plan is integrated with RouteSmart Engine to allow you to import, analyze, and edit your data.

Plan your operations with confidence knowing RouteSmart is partnered with the leading geospatial technology companies
