

RouteSmart
A FEDEX COMPANY

WASTE & RECYCLING COLLECTION

REDUCE COSTS

ENHANCE SAFETY

OPTIMIZE ROUTES

REAL RESULTS.

REAL VALUE.

HAULERS SERVING 50 MILLION HOMES AND BUSINESSES ARE REDUCING COSTS BY 30%

ROUTE PLANNING TO HELP YOU MAXIMIZE SAVINGS

Private and municipal waste haulers across the globe rely on our experience and proven solutions to optimize operating territories.

RESIDENTIAL WASTE & RECYCLING COLLECTION

- Digitize and visualize your routes faster
- Balance and optimize route territories
- Sequence right-side service to improve safety compliance
- Maximize investment in automated collection equipment

COMMERCIAL ROUTE PLANNING

- Balance weekly service patterns and daily workloads
- Increase stops, lifts, and yards per hour
- Adhere to strict time windows
- Manage service for high-priority customers

ROLL-OFF ROUTE OPTIMIZATION

- Increase revenue with an average of two more pulls per route
- Reduce empty rail time
- Optimize daily route plans in minutes

PROVEN ROUTE PLANNING SOLUTIONS

Our systems integrate with your technology to form a complete route optimization solution that meets the demanding operational needs of your business.

Solve your everyday route planning and dispatching needs with our comprehensive suite of tools that model the unique constraints of routing high-density residential collection and the complex service patterns of commercial service.

Integrate RouteSmart Engine directly into your client-side systems to support dynamic daily route balancing and sequencing for roll-off, bulky collection, and other waste collection services. RouteSmart Engine web service provide access to our powerful optimization algorithms through a standard API, accelerating your implementation and return on investment.

Support GIS-based analysis of route operations with the world's leading desktop GIS system from Esri. RouteSmart Plan is integrated with RouteSmart Optimize and RouteSmart Engine to allow you to import, analyze, and edit your data.

Navigate high-density waste collection routes and verify service with SmartSuite Mobile for phones and tablets. SmartSuite Web allows you to view and track realtime activity on live maps in any browser.

INTELLIGENT PLANNING
FOR EFFICIENT OPERATION

Contact Senior Business Development Manager Jessica Cearfoss at 800.977.7284 ext. 3100 or jcearfoss@routesmart.com.

Route optimization and planning is fundamental to your business. Before a single truck leaves your facilities, you need to build the foundation for a successful, efficient day. Our clients benefit from a precision-oriented, detailed approach to solving daily route planning problems, achieving greater efficiency, and improving safety and customer satisfaction.
